

Global Aerospace & Defence Events – Company Participation Analysis 2023

Author: ASIM Analysis Market

Jun 03, 2026.- The global aerospace and defence industry continue to demonstrate remarkable resilience, innovation, and international collaboration. An analysis of company participation across major industry events—including SIAE Paris Air Show, Seoul ADEX, Dubai Airshow, and Aero India during 2023— reveals a highly interconnected ecosystem where manufacturers, technology providers, government organizations, startups, and research institutions converge to accelerate innovation.

Among the events analyzed, SIAE stands out for its scale and international reach, attracting thousands of exhibitors from dozens of countries. Dubai Airshow reinforces its position as a global business hub through strong participation from established corporations and emerging technology companies. Aero India highlights the growing strength of domestic industrial capabilities while maintaining significant international engagement. Seoul ADEX demonstrates the strategic importance of Asia-Pacific defence and aerospace markets through focused industry participation and business-to-business collaboration.

A key trend across all events is the increasing emphasis on strategic partnerships, technology transfer agreements, co-development programs, and supply chain integration. Companies are moving beyond traditional exhibition models and leveraging these platforms to establish long-term collaborations, strengthen innovation ecosystems, and expand global market access.

The data also highlights the growing role of advanced technologies, including autonomous systems, aerospace manufacturing, defence electronics, artificial intelligence, cybersecurity, space technologies, and digital transformation solutions. Participation from startups and specialized technology firms continues to expand, complementing the presence of established industry leaders.

Overall, the participation landscape reflects a global industry focused on collaboration, innovation, and capability development. Organizations that successfully combine international partnerships, local industrial engagement, and technology leadership will be best positioned to capture future growth opportunities in the aerospace and defence sector.
